APTITUDE TRAINING

Name of program	Aptitude Training
Date:	14-18 Nov 2022
Venue/address	Conference hall
Guest	Sanket Sir and Raju Sir
Audience	Students of T E and B tech of all department

Aim: To organize Skill for solving Aptitude .

Objectives of program:

The Software Engineering Aptitude Test is one such test that assesses applicants' competencies required for the software engineering jobs they are interviewing for to predict their work performance based on data, so it is an unbiased and objective evaluation.

There is strong reason behind it. Clearing aptitude proof of having very good logic. Now focusing about programming skills in particular language, they will provide training on programming language and one can easily start working on that language after industry training .But they cant build logic in you. So aptitude is very important test. You should be prepared for it. To develop such skill in student training is important.

Student need to check analytical and problem solving skills. When they work as a software developer they have lot of thing to do and need to take right decision at right time. So skills are specific to industries and give focus to theoretical knowledge,. It is comparatively easier to learn hard skills. For example, data analysis, mathematical calculation, architectural designing, and web development are hard skills that can be taught using pen and paper. But aptitude training is way more demanding, including training employees to develop and enhance their critical thinking abilities. So Aptitude testing is not about what you know, it's about what you have the potential to learn and/or perform..

The inaugural of the trianing witnessed the presence of **Mr. Ruturaj Sawant Director, Dr. A. K. Deshmane Principal**, BIT Barshi, along with the faculty and staff members of Department.

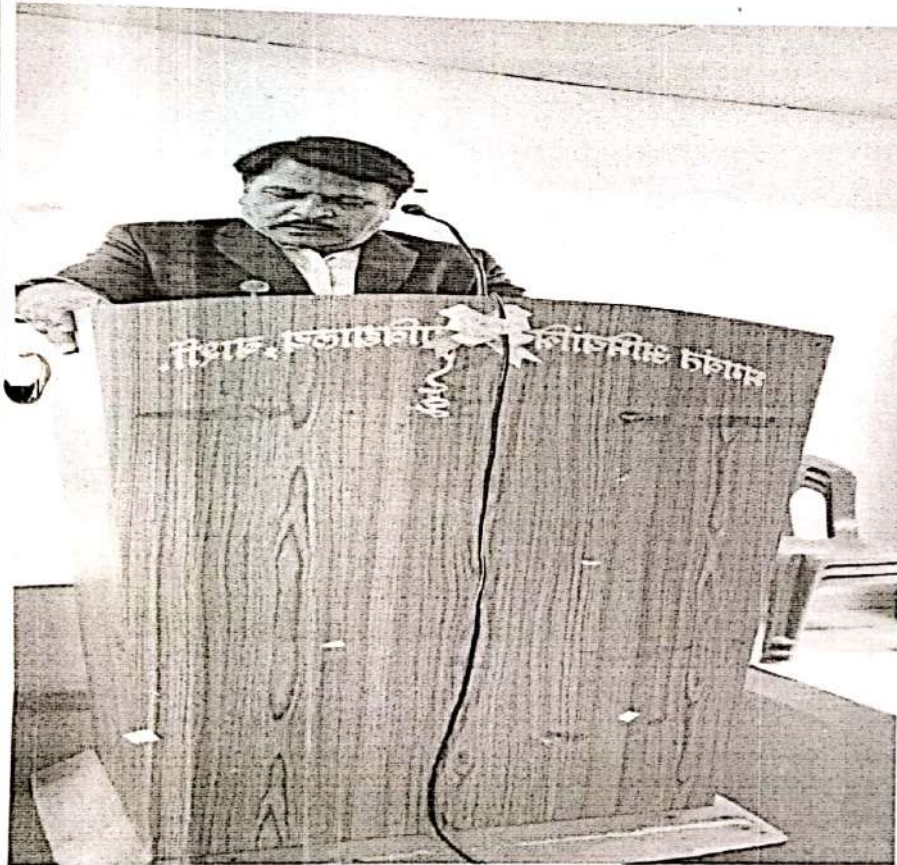

With an increasing professional environment, training have become a high-demand necessity in every organization. Recruiters monitor skills while interviewing them for a role. It is always essential to help you accomplish goals, take you forward in your skilled profession,

Participants: The 93 Students of Third and Final year students of all department actively participated in the session.

Conclusion: The student of all department has participated and successfully completed add on course

Core and Java TRAINING

Name of program	Core and Java Training
Date:	24 /11/2022 -8 DEC 2022
Venue/address	Conference hall
Guest	Mahajan Sir
Audience	All Students of E&TC department

Aim: To organize Core Java Training for improve the technical Skill .

Objectives of program:

It can be found in almost every operating system and application. Its ease of use and versatile nature makes Java a favored programming language among small and large businesses evaluation.

Companies across the globe use Java to build the applications and websites they offer their consumers. Learning this programming language means you've completed one of the prerequisites that could qualify you for a career in software or app development core java language is more useful

While hard skills are specific to industries and give focus to theoretical knowledge, soft skills refer to personality and attitude. It is comparatively easier to learn hard skills. For example, data analysis, mathematical calculation, architectural designing, and web development are hard skills that can be taught using pen and paper. But programming training is way more demanding, including training employees to develop work-friendly behaviors and enhance their knowledge and logical thinking.

The inaugural of the trianing witnessed the presence of **Mr. Raturaj Sawant Director, Dr. A. K. Deshmane Principal**, BIT Barshi, along with the faculty and staff members of Department.

With an increasing professional environment, technical knowledge have become a high-demand necessity in every organization. Recruiters monitor candidates' while interviewing them for a role. It is always essential to build interpersonal qualities. A significant benefit to Java is the wide range of tasks it can be used to perform. It is highly beneficial for tasks and projects requiring both high performance and quick turnaround. Here are a few of the most common tasks for which Java is make easier and familiar for student is the purpose of training.

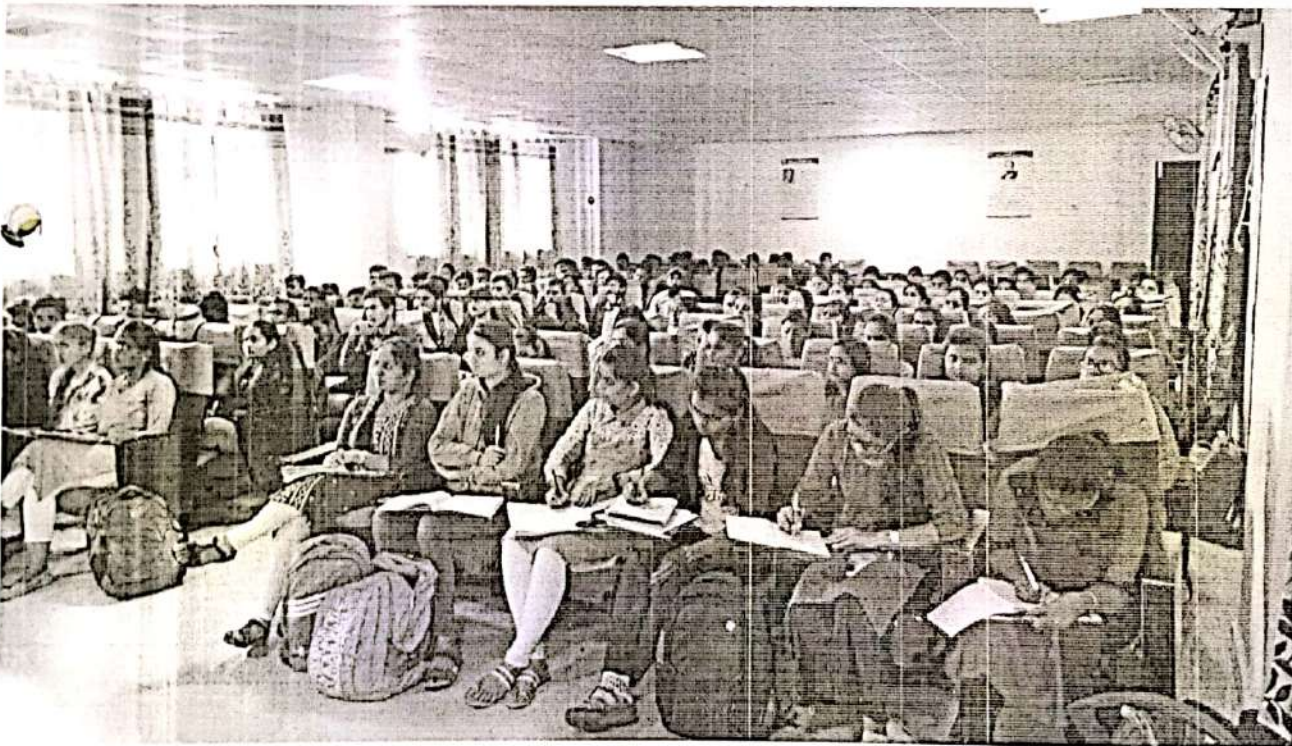

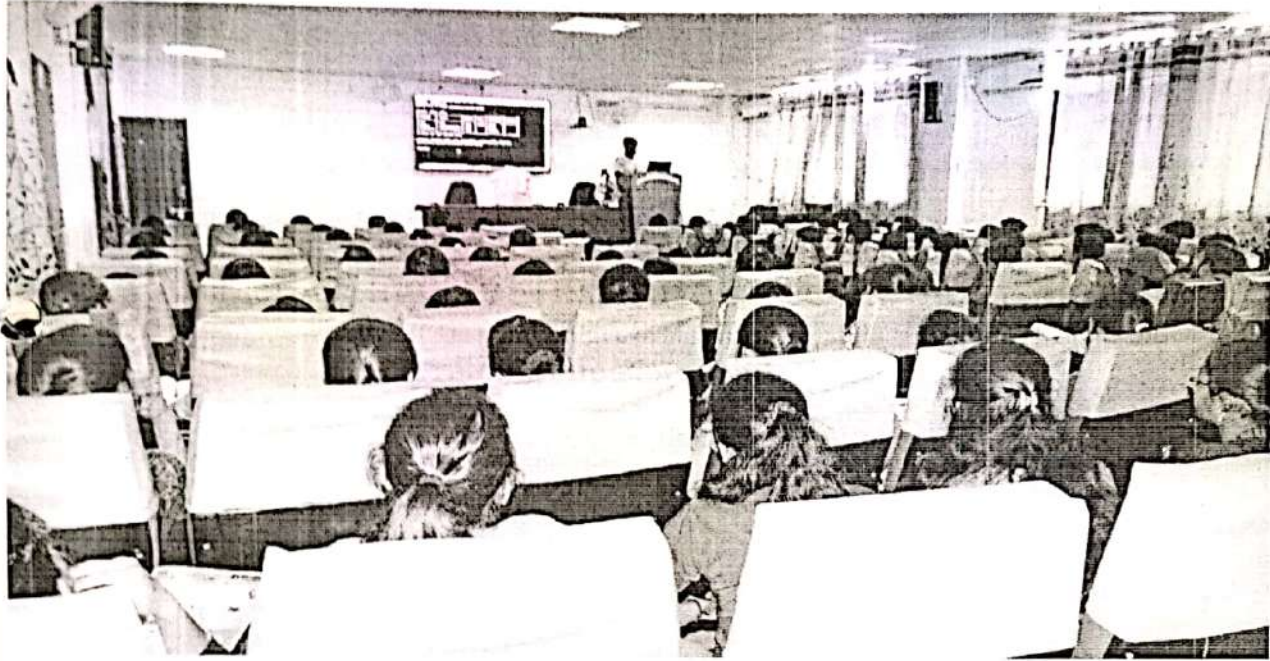

Participants: The 78 students of Third and Final year students of E&TC and CSE department actively participated in the session.

Conclusion: The student of E&TC and CSE department has participated and successfully completed add on course
